

HA30

Portable Telephone Handset Amplifier

Designed for persons with mild to moderate hearing loss. Ideal for use in homes and offices. Use it on-the-go... even in hotels.

Features

Powerful amplifier provides up to 30dB of incoming voice amplification

Adjustable Tone Control (400-2600Hz) lets you adjust the frequency of the incoming voice so that even similar-sounding words, such as “chair” and “share”, are crystal clear and easy to understand

Adjustable volume control lets you set the loudness to suit your hearing

Compact and portable so you can take it with you anywhere

Connects easily between handset and phone base, no wiring involved

Battery indicator light comes on every time you lift the handset to indicate that the battery level is high enough (battery included)

Works with analog and digital phones

HA30

Portable Telephone Amplifier

Features (continued)

Compact and portable so you can take it with you anywhere

Works with either analog or digital telephones with a cord and where the keypad is in the base

One year warranty
